

Reynobond®

Architecture

Reynobond® Design Line
Nature. Now available in aluminum.

Environmentally sound products that are virtually indistinguishable from their natural counterparts

At first glance you'd swear it's really mahogany. Or granite. Or copper patina. Reynobond® wood, mineral, granite, patina and stone paint finishes – inspired by Mother Nature – offer a variety of striking design choices with all the benefits of Reynobond Aluminum Composite Material.

Thanks to the lightweight panel's remarkable strength and flatness, you can explore an endless variety of interior and exterior design options. Even the most challenging architectural concepts are easy to accomplish.

In addition, with Reynobond Face Fastened Solutions you enjoy a perfect combination of durability, flexibility, simplicity and affordability. The exposed fastener system offers all the advantages you expect from Reynobond Aluminum Composite Material, including the ability to withstand extreme temperatures and humidity, meaning there are no geographic limitations as to where it can be used. Plus we can also provide screws that match the finish.

Reynobond Design Line. It's another example of Excellence in Innovation from Alcoa Architectural Products that can help you make an impact on our world.
